

The route

Each one of us comes from different places and from different life experiences, but now we're in this together, in this out of time places. We'll share this journey, during which we'll know each other and we'll stay side by side to reach our destination.

A light breeze cools the air, waiting for the Sun to rise. A new day has come and we're long way from the destination. We'll stay together to gain our freedom and take back the authentic life we've always dreamt of.

Nature and fellow travelers will relieve us from the efforts. This journey will makes us stronger and will cheer our souls up.

Spending the evening sharing life stories by the fire till late night. Our fellow travelers we didn't know have become irreplaceable. Here, by the fire, surrounded by wild nature, the key moment has arrived: the beginning of a change for some of us, or the opening of new horizons for others.

The path is still curvy and the enemy knows all our weaknesses, he knows how to misdirect us. So, we'll try to tear up the track behind us to find shelter elsewhere, relying on ourselves and on the community spirit.

A true story, almost forgotten, a legend grandparents still tale in front of the fireplace...

THE PROJECT **MARCHE CINEMA**

To support the regional film production and to promote Le Marche treasures, Le Marche Film Commission (in partnership with Fondazione Marche Cultura, Regione Marche, Expirit and the Confederation of Professional Craftsmen – Cinema Division) started the tourist cluster **Marche Cinema**: a new world of experiences, routes and stories created to experience the most charming sets of the region personally, like never before.

This new journey starts with La Banda Grossi movie tour, an entirely Made in Le Marche independent film produced by Cinestudio in 2018, co-financed by Regione Marche and by the Ministry of Cultural Heritage. Actually, La Banda Grossi was judged film of historical and cultural interest.

Directed by the filmmaker Claudio Ripalti, the film tells an old-bravery story made by the gang La Banda Grossi, led by a former day labourer, Terenzio Grossi. Around the year 1860, at the dawn of the Unification of Italy, the territory of Montefeltro was rocked by the adventures of seven insurgent bandits. They wanted the Unification to stop to release the local working class, which was starving due to the Sabaudian laws and to a corrupt system, making people live in conditions of extreme poverty.
